PROJECTS

Chat Web App I Link

Dec 2024 - Present

Domain: React Js, Node js, Socket.io

- Developed a real-time chat application using Socket.IO for instant messaging and React.js for a dynamic UI.
- Built Node.js backend with RESTful APIs for user authentication and message handling.
- · Implemented state management and component-based architecture for efficient UI updates and scalability.

Course Web App | Link

Sep 2024 - Dec 2024

Domain: React Js

- Developed an interactive course management app with dynamic course listings, user reviews, and responsive design.
- Implemented reusable components and state management for efficient UI updates.
- Designed the app with a responsive layout and user-friendly interface.

Finance Tracker App | Link

Jul 2024 - Aug 2024

Domain: React Js

- Developed the front-end of a Finance Tracker app using React Native for cross-platform mobile development.
- Integrated charting libraries to visualize financial data, including expenses, income, and savings.
- Implemented state management using React hooks to handle dynamic updates and data flow.
- Focused on creating a user-friendly interface and responsive design for an optimal mobile experience.

Poll Web App | Link

Mar 2024 - Jun 2024

Domain : Python using Django

• Created a web-based polling platform allowing users to create, vote, and track poll results. - Leveraged Django ORM for robust database handling and real-time result updates. - Designed intuitive interfaces to enhance user engagement and accessibility.

Tv Show Web App I Link

Oct 2023 - Dec 2024

Domain: ASP.NET Core

- Built an MVC web application to display TV show listings, detailed information, and user reviews.
- Implemented CRUD operations for show data, allowing seamless updates and secure data interactions.

Task Manager Web App I Link

Aug 2023 - Oct 2023

Domain: React Js, MongoDb

- Developed a full-stack Task Manager web application that enables users to create, manage, and organize tasks efficiently.
- Utilized React.js for building a dynamic and responsive front-end, while Node.js and Express.js powered the back-end.
- Integrated MongoDB for data storage and Material-UI for an intuitive user interface.
